## Included in this report

---

This report can be generated with filters applied to operating system platforms, components, and/or software capabilities. This section reflects how the report was filtered when it was generated.

### Legend

- The information about this item is included in this report.
  - The information about this item is not included in the report filter.
- 

### Platforms

- Windows

### Component list

#### Desktop

- IBM SPSS Amos Desktop

### Capabilities

#### Related Software

- Collaboration
- Provisioning
- Terminal Services
- Virtualization Management
- Web Browsers

# Operating Systems

The Operating systems section specifies the operating systems that IBM SPSS Amos 31.0.0.0 supports, organized by operating system family.

### Component support

- Full
- Partial
- None

## Operating system families

[Windows](#)

## Windows

### Summary

Operating system	Operating system minimum	Hardware	Bitness	Product minimum	Components 	Notes?
<a href="#">Windows 10 Education</a>	Base	x86-64	64-Tolerate	31.0.0.0	<input checked="" type="radio"/>	No
<a href="#">Windows 10 Enterprise</a>	Base	x86-64	64-Tolerate	31.0.0.0	<input checked="" type="radio"/>	No
<a href="#">Windows 10 Home</a>	Base	x86-64	64-Tolerate	31.0.0.0	<input checked="" type="radio"/>	No
<a href="#">Windows 10 Pro</a>	Base	x86-64	64-Tolerate	31.0.0.0	<input checked="" type="radio"/>	No
<a href="#">Windows 11 Enterprise</a>	Base	x86-64	64-Tolerate	31.0.0.0	<input checked="" type="radio"/>	No
<a href="#">Windows 11 Pro</a>	Base	x86-64	64-Tolerate	31.0.0.0	<input checked="" type="radio"/>	No
<a href="#">Windows Server 2012 R2 Datacenter Edition</a>	Base	x86-64	64-Tolerate	31.0.0.0	<input checked="" type="radio"/>	Yes
<a href="#">Windows Server 2012 R2 Essentials Edition</a>	Base	x86-64	64-Tolerate	31.0.0.0	<input checked="" type="radio"/>	Yes

Operating system	Operating system minimum	Hardware	Bitness	Product minimum	Components 	Notes?
Windows Server 2012 R2 Standard Edition	Base	x86-64	64-Tolerate	31.0.0.0		Yes
Windows Server 2016 Datacenter Edition	Base	x86-64	64-Tolerate	31.0.0.0		Yes
Windows Server 2016 Essentials Edition	Base	x86-64	64-Tolerate	31.0.0.0		Yes
Windows Server 2016 Standard Edition	Base	x86-64	64-Tolerate	31.0.0.0		Yes
Windows Server 2019 Datacenter Edition	Base	x86-64	64-Tolerate	31.0.0.0		Yes
Windows Server 2019 Essentials Edition	Base	x86-64	64-Tolerate	31.0.0.0		Yes
Windows Server 2019 Standard Edition	Base	x86-64	64-Tolerate	31.0.0.0		Yes

## Windows Notes

1. If SPSS AMOS is installed on a supported Windows Server operating system, it must use a Concurrent License.

# Hardware

IBM SPSS Amos 31.0.0.0 requires the following hardware organized by operating system family.

## Operating System Families

### Windows

#### Windows

Hardware	Components	Requirement	Applicable operating systems
Disk Space	<b>Desktop</b> <ul style="list-style-type: none"><li>IBM SPSS Amos Desktop</li></ul>	1 gigabytes (GB) of available hard-disk space.	All supported Windows operating systems
Memory	<b>Desktop</b> <ul style="list-style-type: none"><li>IBM SPSS Amos Desktop</li></ul>	2 gigabyte (GB) of RAM or more	All supported Windows operating systems
Processor	<b>Desktop</b> <ul style="list-style-type: none"><li>IBM SPSS Amos Desktop</li></ul>	Intel or AMD x86 processor running at 1 gigahertz (GHz) or higher	All supported Windows operating systems
Product specific	<b>Desktop</b> <ul style="list-style-type: none"><li>IBM SPSS Amos Desktop</li></ul>	<ul style="list-style-type: none"><li>Intel or AMD x86 processor running at 1 gigahertz (GHz) or higher</li><li>2 gigabyte (GB) of RAM or more</li><li>1 gigabytes (GB) of available hard-disk space.</li><li>Because the installer extracts files before installing, the same amount of temporary disk space is also needed for the installer.</li><li>If using physical installation media, DVD/CD drive</li><li>XGA (1024x768) or a higher-resolution monitor</li></ul>	All supported Windows operating systems

# Glossary

---

**Bitness**

Compatibility of the product with the bit version support that is provided by an operating system. Different parts of a product might run on the same operating system but support different application bitness. For example, one part of the product might run only in 32-bit mode, whereas another might support 64-bit tolerate mode.

**31:** The product or part of the product runs as a 31-bit application in a 31-bit operating environment.

**32:** The product or part of the product runs as a 32-bit application in a 32-bit operating environment.

**64-tolerate:** The product or part of the product runs as a 32-bit application in a 64-bit operating environment.

**64-exploit:** The product or part of the product runs natively as a 64-bit application in a 64-bit operating environment.

---

**Co-packaged**

Additional products that are included in the product package.

---

**Co-installed**

Additional products that are included in the product package and installed when the product is installed.

---

**Deployment unit**

**Deployment Structure** identifies pieces of a product that can be independently deployed onto one or more machines in a distributed infrastructure.

- The top level of the deployment structure consists of one or more deployment units. There are four possible deployment units that a product might support: Desktop, Server, Agent or client, Mobile.
- Deployment units may be further divided into deployable **components**

**Desktop** deployment unit: Part of the deployment structure intended for use by a single user, typically installed on the user desktops. Examples of desktop deployment units include development tools, administrative tools, stand-alone business applications.

**Server** deployment unit: Part of the deployment structure that can provide services to multiple clients, providing the server in a client-server architecture. Examples of server deployment units include application servers, management servers, database servers and server-based business applications.

**Agent or client** deployment unit: Part of the deployment structure that allows remote connection between software. Examples of agent or client deployment

units include agents in management system that are installed in the same tier as the managed resources, a remote application, or database clients that are installed with the software accessing the remote services.

**Mobile** deployment unit: Part of the deployment structure intended for use by a single user, typically installed on a mobile device. An example of a mobile deployment unit is a mobile application.

---

<b>Hypervisor</b>	A virtual machine in which a product can run on a guest operating system.
-------------------	---

---

<b>Limited operating system support</b>	By default, the supported guest operating systems for a product and a hypervisor are the operating systems that are supported by both the product and the hypervisor. If a product restricts support to a subset of these operating systems, this restriction will be indicated by specifying that there is Limited Operating System Support.
---	---

---

<b>Operating system minimum</b>	The minimum operating system maintenance level that is required to run on the product.
---------------------------------	--

---

<b>Prerequisite minimum</b>	The minimum maintenance level that is required for the prerequisite to work with the product.
-----------------------------	---

---

<b>Product minimum</b>	The minimum maintenance level that is required for the product to run on the operating system, on an hypervisor, or work with a prerequisite product or supported software.
------------------------	---

---

<b>Supported software minimum</b>	The minimum maintenance level that is required for the supported software to work with the product.
-----------------------------------	---

---

<b>Long Term Support Release</b>	A Long Term Support Release is a recommended product level for which support, including defect and security updates, will be provided over a specified period of time.
----------------------------------	--

---

<b>Continuous Delivery Product</b>	A Continuous Delivery Product delivers new function to clients more frequently.
------------------------------------	---

---

<b>Continuous Delivery Product - Long Term Support Release</b>	A Continuous Delivery Product delivers new function to clients more frequently. Since frequent releases may not be suitable for all client environments, Long Term Support Releases provide a package that will be supported for a longer period of time.
