Remark Web Survey - Features List

Designer Features

- Intuitive interface allows for easy creation of web-based forms without having to know any HTML or web programming
- Converts Remark Office OMR and Remark Classic OMR template files into HTML forms with the click of a mouse, allowing you to collect data seamlessly from paper and the web
- Allows for single or multiple response questions (option buttons, checkboxes, and drop down lists) as well as textboxes
- Supports using graphics as answer items (i.e. charts, graphs, shapes, pictures, etc…)
- Allows you to specify an input pattern for a textbox question (phone number, date, etc…)
- Allows you to format the form the way you want it to look, including using rich text formatting. Insert text, graphics and lines where desired. Change colors and fonts to match the design of your website. Apply styles to an entire web form quickly and easily
- Allows you to add multiple columns to a form, format questions in tables, include hidden questions and specify which questions are required
- Supports multimedia (.swf, .avi, .mpg, .wmv, .wav, .asf, .mp3, .mov, .ram, .rm)
- Allows you to create hyperlinks on a form to direct respondents to another question on the form, a pop-up info page, an external web page or send an email message
- Supports the use of skip patterns, or question branching, based on how questions are answered
- Supports the use of answer piping, allowing you to "pipe" the answer from previous questions into a future question, answer or label
- Contains a spell checker
- Allows you to create customized success, or "thank you" pages for respondents to see upon successful web form submission
- Creates multi-page web forms
- Allows respondents to pause the web form at any point and return later for completion
- Provides a confirmation page for respondents to view their responses
- Allows you to create customized error messages for your respondents
- Allows you to apply passwords to forms, and includes the ability to import a list of valid passwords
- Contains an automatic form publishing feature for streamlined access to web server to publish web forms
- Provides a list of respondents who have and have not completed password-protected forms
- Contains an email center where you can send invitations to your web form or email reminders to those who have not yet completed the web form

Data/Analysis Features

- Tabulates surveys and grades tests with Remark Quick Stats®
- Includes a Grade Wizard that supports multiple answer keys, multiple grade scales, benchmarking and learning objectives
- Automatically filters report data based on questions from the web form (i.e. for course evaluations, run reports on specific instructors and classes automatically)
- Automatically downloads data into the software for export or analysis
- Records the time it takes respondents to complete your web form and stores this in a duration field in your data set

- Supports query parameters that allow to pass a value into your form behind the scenes (i.e. for course evaluations you can insert an instructor's name into the invitation URL that will pass the name into your data for that respondent)
- Downloads incomplete web form submissions
- Supports filtering incomplete data submissions based on a completion percentage in order to only analyze records that are X% completed
- Allows IP tracking; when tracking is turned off, the responses are truly anonymous
- Offers a live look at the current responses using Remark Live Stats™
- Remark Live Stats™ now offers Item Analysis, Comment Report, and Duration Report
- Remark Quick Stats provides a detailed analysis of surveys and a complete grade report for tests, including:

Survey Reports Include

- o Detailed Item Analysis Report
- o Item Analysis Graph Report
- o Condensed Item Analysis
- o Analysis Group Report
- o Item Statistics Report
- o Crosstabulation Report
- o Comparative Item Report
- o Response Report by Item
- o Response Report by Respondent

Test Reports Include

- o Student Statistics Report
- o Comparative Grade Report
- o Class Frequency Distribution
- o Test Statistics Report
- o Detailed Item Analysis Report
- o Item Analysis Graph Report
- o Condensed Item Analysis
- o Test Item Statistics Report
- o Crosstabulation Report
- o Student Grade Report
- o Response Report by Item
- o Response Report by Respondent

- Saves data to over 30 different file formats:

- o Remark (RMK)
- o SPSS (SAV)
- o Survey Pro SRV (SRV)
- o Survey Pro STL (STL, ST3)
- o Survey System (DAT)
- o ASCII [commas] (ASC)
- o ASCII [tabs] (ASC)
- o Spreadsheet [commas]
- o Spreadsheet [tabs]
- o Report (RPT)
- o DIF Files (DIF)
- o Access 2007 (.ACCDB)
- o Access 2000, 2002, 2003 (MDB)
- o Access 95, 97 (MDB)
- o Access 2.0 (MDB)
- o Access 1.0 (MDB)
- o LXR Test (MRG)
- o Questionmark (QSF)
- o HTML (HTM)
- o XML

- o dBase V (DBF)
- o dBase IV (DBF)
- o dBase III (DBF)
- o Excel 2007 (XLSX)
- o Excel 97-2003 (XLS)
- o Excel 5.0-7.0 (XLS)
- o Excel 4.0 (XLS)
- o Excel 3.0 (XLS)
- o Lotus WK3 (WK3)
- o Lotus WK1 (WK1)
- o Lotus WJ3 (WJ3)
- o Lotus WJ2 (WJ2)
- o Lotus 1-2-3 (WKS)
- o Paradox 5.X (DB)
- o Paradox 4.X (DB)
- o Paradox 3.X (DB)
- o ODBC
- o SQL Server 2000-2005 (MDF)
- o Oracle 7.4 and later

Administration Features

- Emails complete form submissions to any email address
- Supports embedding passwords into email invitation urls
- Allows you to personalize emails through adding merge fields, such as respondent name
- Allows you to create and save email templates for invitations
- Supports importing email address lists from a variety of databases and spreadsheets
- Allows for page and answer choice randomization
- Allows you to schedule your web form with a live start time and/or end time
- Allows you to cap the number of respondents that can submit your web form
- Allows for session timeouts with password-protected web forms for added security
- Sends response submissions based on answers to specific questions
- Emails responses to respondents
- Supports Linux/UNIX or Windows based web servers running Perl 5.6.2 or later
- Configurable control panel permission levels for users. There are three levels: Administrator (full control), Standard (access to Remark Live Stats and data) and Restricted (access to Remark Live Stats and data for particular web forms)
- Supports data archiving (when you publish a form that already has data, a back-up copy of the data will be saved on your server)
- Includes a diagnostic section in the control panel to assist with troubleshooting
